

How to compile and run:

1. Place all the files with .java extension inside a single folder.
2. Open Terminal/Console/Command Prompt (depending on your OS).
3. Navigate to the folder containing your .java files.
4. Enter `javac *.java` to compile the code.
5. Upon successful compilation of the code, your cursor will go to the next line.
6. Enter `java KnightsTourMain`
7. The game window will appear. Choose valid "Knight-moves" to progress through the game. You shall not choose the current square or any of the previously visited squares, as it would be considered an invalid move. Click on 'New Game' to start a new game at any time.
